## COVID-19 Therapeutics

Dear providers,

COVID-19 therapeutics are used to treat patients who have tested positive for COVID-19 but are not hospitalized. Prevention and early treatment for eligible members can help improve patient outcomes, reduce stress on healthcare facilities, and even save lives.

**The Office of the Assistant Secretary for Preparedness and Response has created a map of locations that carry COVID-19 Therapeutics. <https://covid-19-therapeutics-locator-dhhs.hub.arcgis.com/>**

Please consider providing the website address to HPSM members so they can locate and pick the medication up on their own. Please also be sure to call to confirm the location has the product in stock before heading over.

We encourage prescribing COVID-19 therapeutics to patients who may benefit from treatment, such as those with pre-existing conditions that place them at higher risk of hospitalization or death. Please refer to COVID treatment guidelines such as those published by the CDC, NIH, or IDSA for further information.

For questions, please contact our Provider Services department at [PSInquiries@hpsm.org](mailto:PSInquiries@hpsm.org).

Thank you for your continued commitment to our community,  
The Health Plan of San Mateo
